Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 November 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.

DETAILED ACTION

Election/Restrictions

1. Claims 3-5 and 9-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 15, 2004.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,151,955 to Stouffer.

Regarding claim 1, Stouffer discloses an oscillating spray nozzle (125) having a liquid inlet chamber (not labeled, see Figure 19), oscillatory chamber (not labeled, see Figure 19), an outlet chamber (134) defining a longitudinal axis (see Figure 19). Furthermore, Stouffer discloses a vortex section (128), and a stream deflector (135) disposed in the vortex section upstream of the entrance to the outlet chamber, wherein the stream deflector extends in a direction laterally of the axis from one wall of the vortex section to an opposite wall thereof (See Figures 4 and 27).

Regarding claim 2, the deflector is arranged symmetrically with respect to the axis. See Figure 19.

Regarding claim 7, the deflector is permanently attached. See Figure 4 and 27.

Regarding claim 8, the deflector has a cylindrical shape. See Figure 19.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 4,151,955 to Stouffer.

Stouffer discloses many different types and positions of deflectors throughout the Figures. Stouffer does not disclose a deflector can be removeably attached to the base. It would have been obvious to one having ordinary skill in the art at the time the

invention was made to modify the spray device of Stouffer with a removeably attached deflector in order to provide for a device with greater flexibility.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 4,562,867 to Stouffer discloses a fluid oscillator with a deflector (B). U.S. Patent No. 5,749,525 to Stouffer discloses a fluidic oscillator without a deflector. U.S. Patent No. 5,853,624 to Raghu et al. discloses a fluidic spray nozzle with a deflector (62). U.S. Patent No. 3,563,462 to Bauer discloses a gas-liquid fluidic oscillator with a deflector (18).
